- 4 Network rollout plan

Foreword from Rajiv Datta, CEO

Welcome to our latest quarterly network rollout report.

Our year started positively and our progress continues at pace; at the end of March 2024 our network had reached 986,831 premises (ready for service RFS).

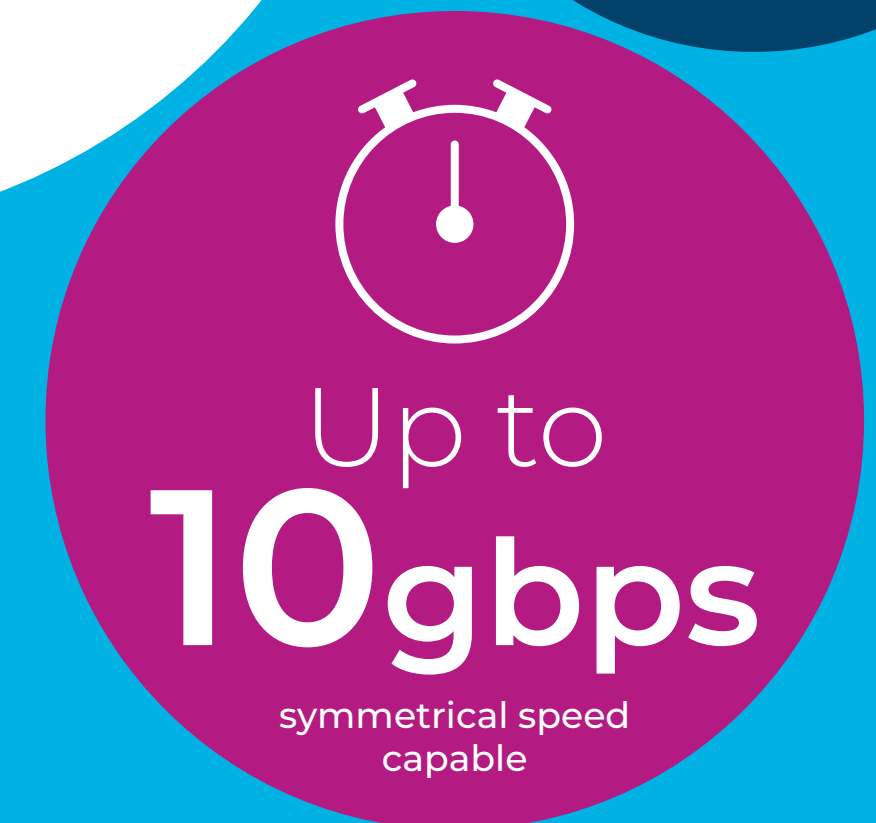

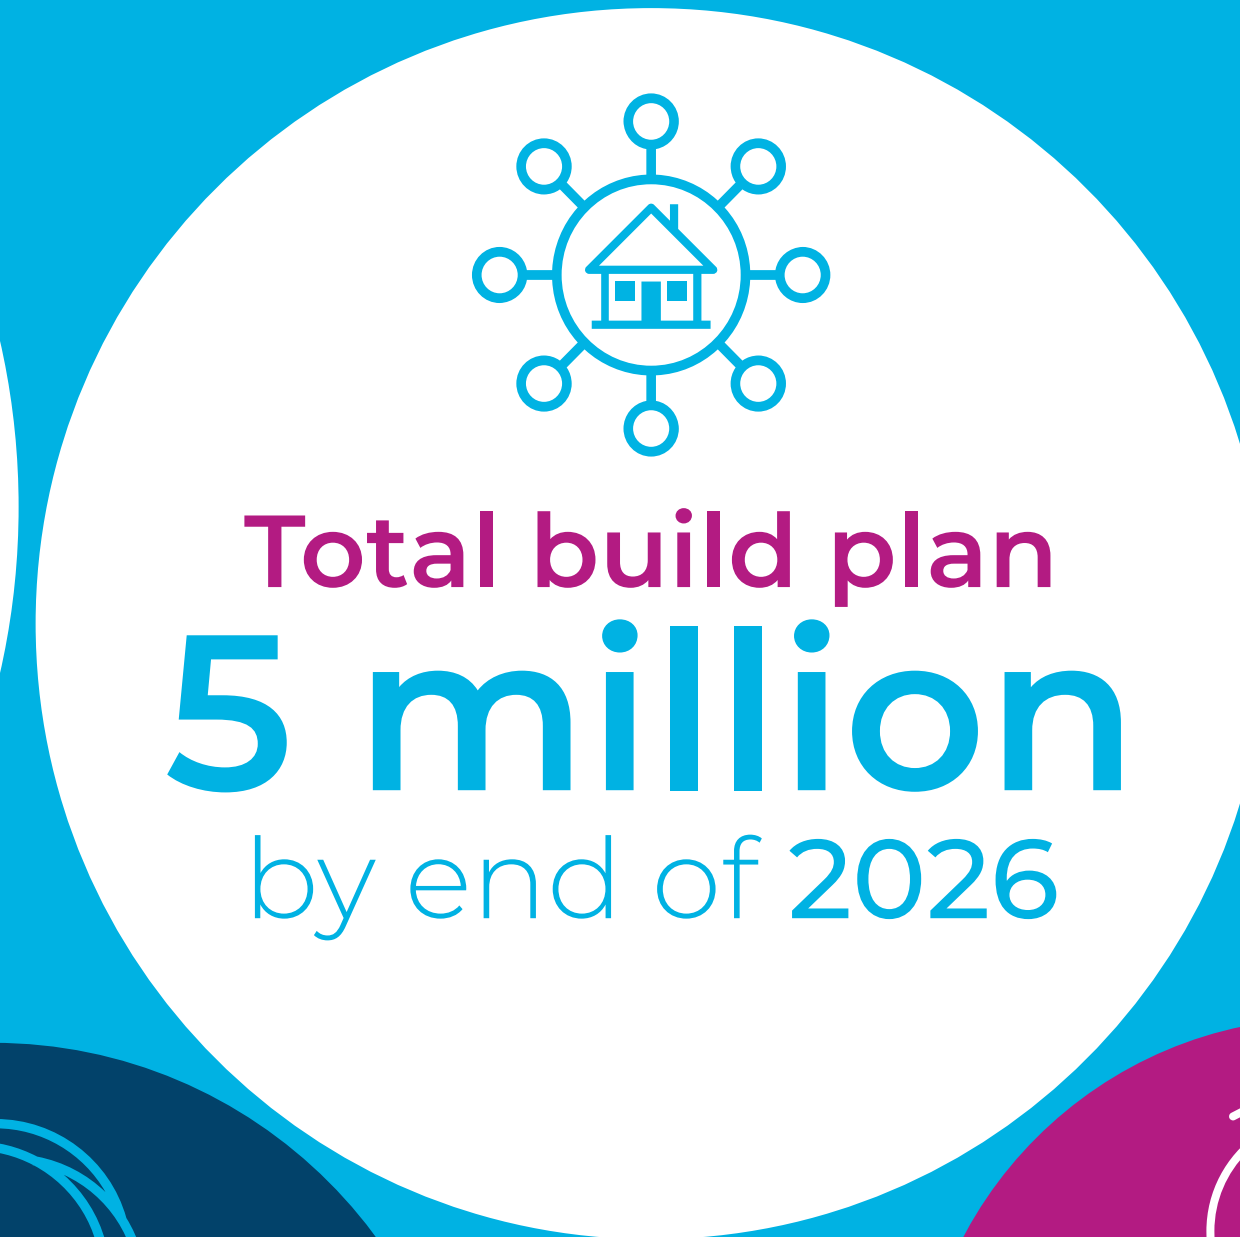

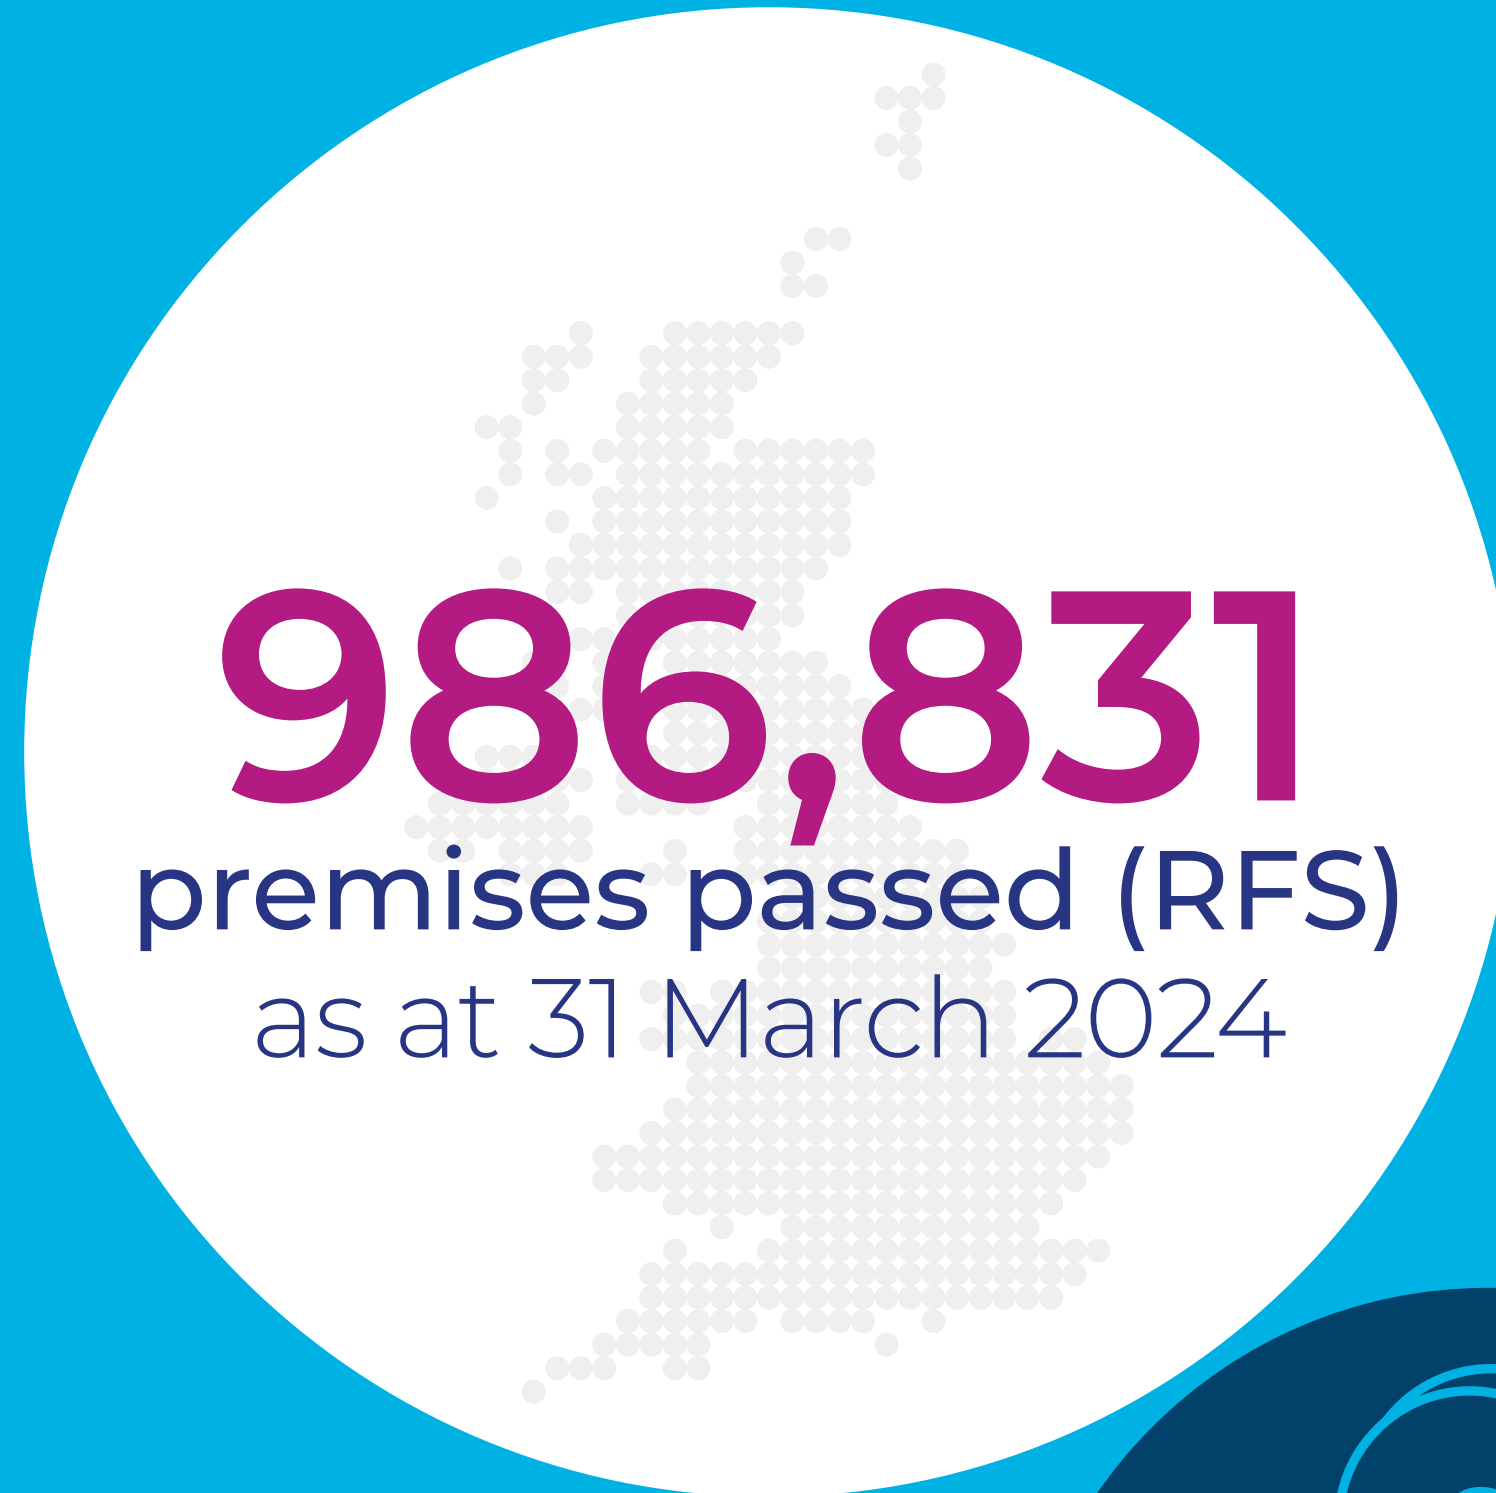

It is testament to the hard work of our team, our partners at Virgin Media O2, and our world-class investors that we have been able to accelerate activity and achieve this reach in such a short period of time.

Unlike others, nexfibre is a wholesale-only provider, which enables us to focus entirely on building and maintaining a high-quality, technologically advanced, full-fibre infrastructure platform for all ISPs and businesses to meet their needs today and in the future.

We remain steadfast in our commitment to delivering the high-quality digital infrastructure that has the power to create lasting value in the communities we serve.

I firmly believe that we are building a platform to foster sustainable competition in the UK fibre market, that will drive innovation for generations to come.

nexfibre is a next generation fibre network operator, formed in December 2022. We are on a mission to deliver our network to more than 5 million premises by 2026, using the latest XGS-PON architecture, capable of symmetrical speeds of up to 10 Gbps.

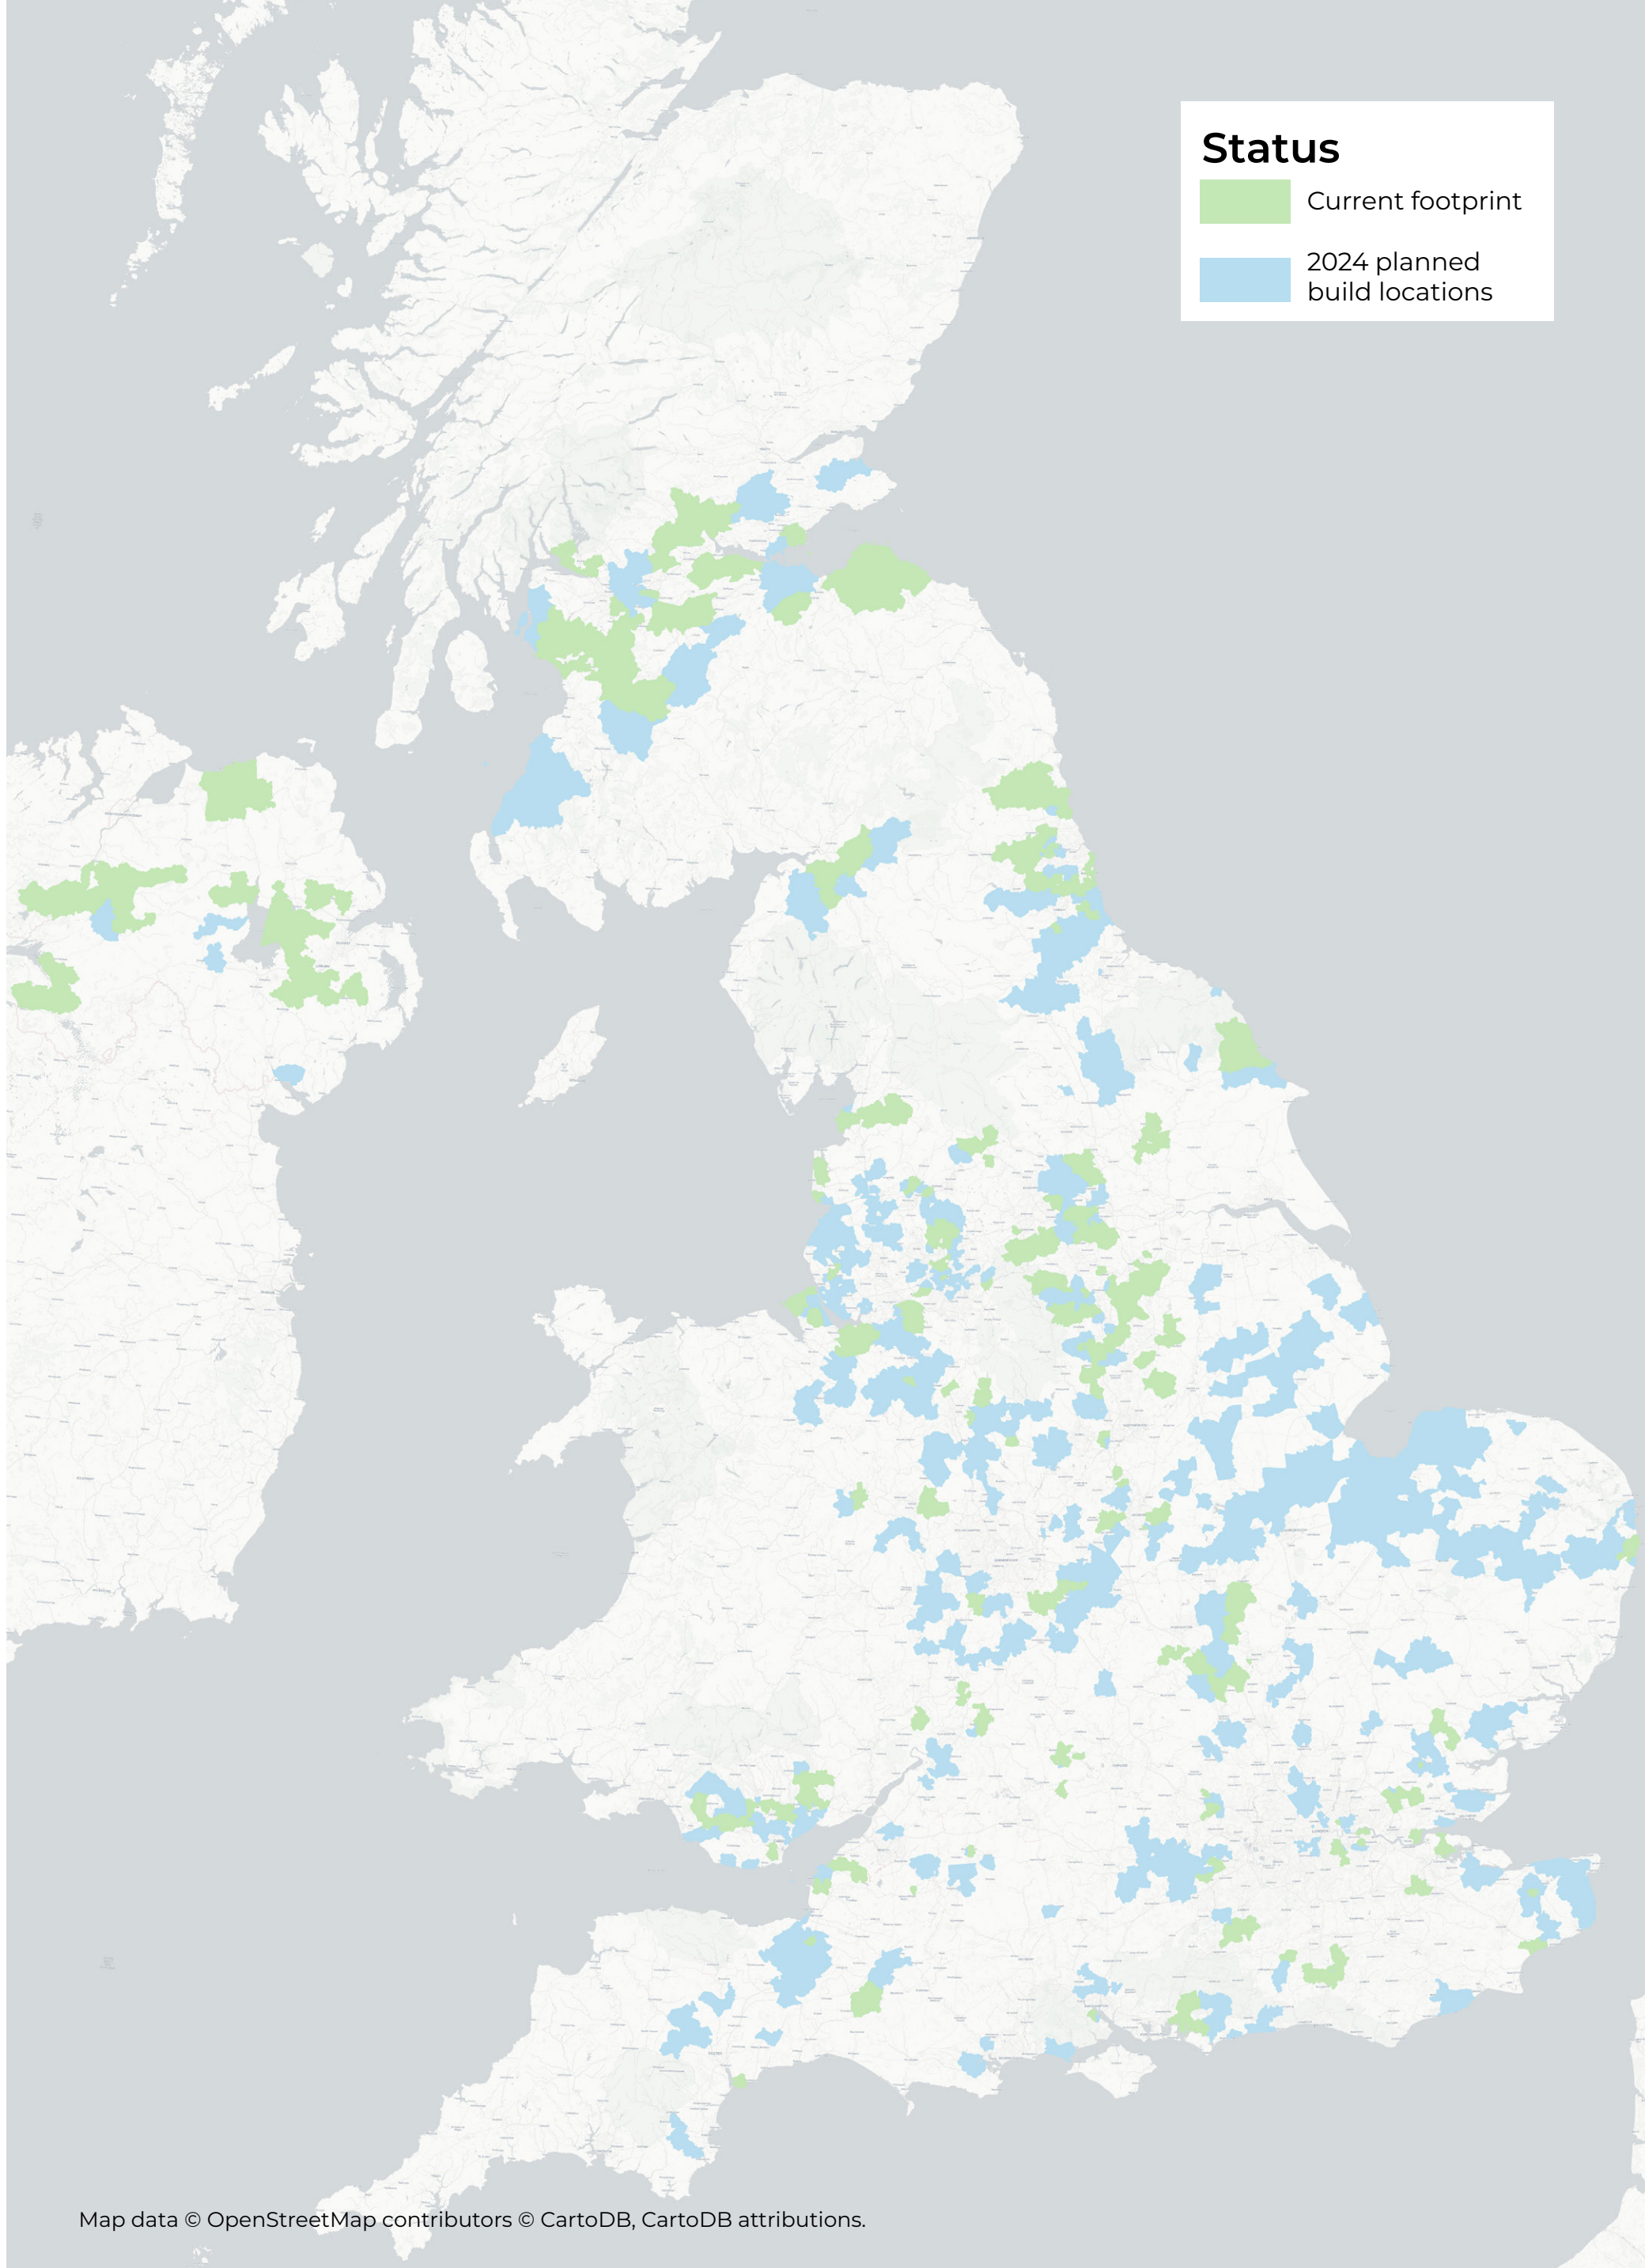

Network rollout plan

nexfibre is bringing full fibre to more than 5 million premises across the UK by the end of 2026.

This map shows our current footprint, and locations where we are planning to build in 2024.

The following pages provide a breakdown, by build location, of existing footprint, current activity and planned build for the remainder of 2024.

As at 31 March 2024.
