

Network coverage update

As at 31st March 2025

Foreword

In just over two years, our progress has been remarkable; expanding our full fibre network to more than 2.2million premises, faster than any other UK network operator. This achievement reflects the commitment of our shareholders, the dedication of our team and partners, and the ambition that defines nexfibre.

As we look ahead, we are mindful that a significant proportion of our build plan would result in overbuild with existing altnet infrastructure in the current fragmented environment. This would clearly be an inefficient use of the significant capital we have available and do nothing to help move the market to a healthier place.

We've long said that the current market structure is unsustainable, and we continue to believe that industry rationalisation and consolidation is both inevitable and necessary. That's why we're reassessing our plans with a view to using some of our financial capability in a smarter way to seize opportunities as they emerge.

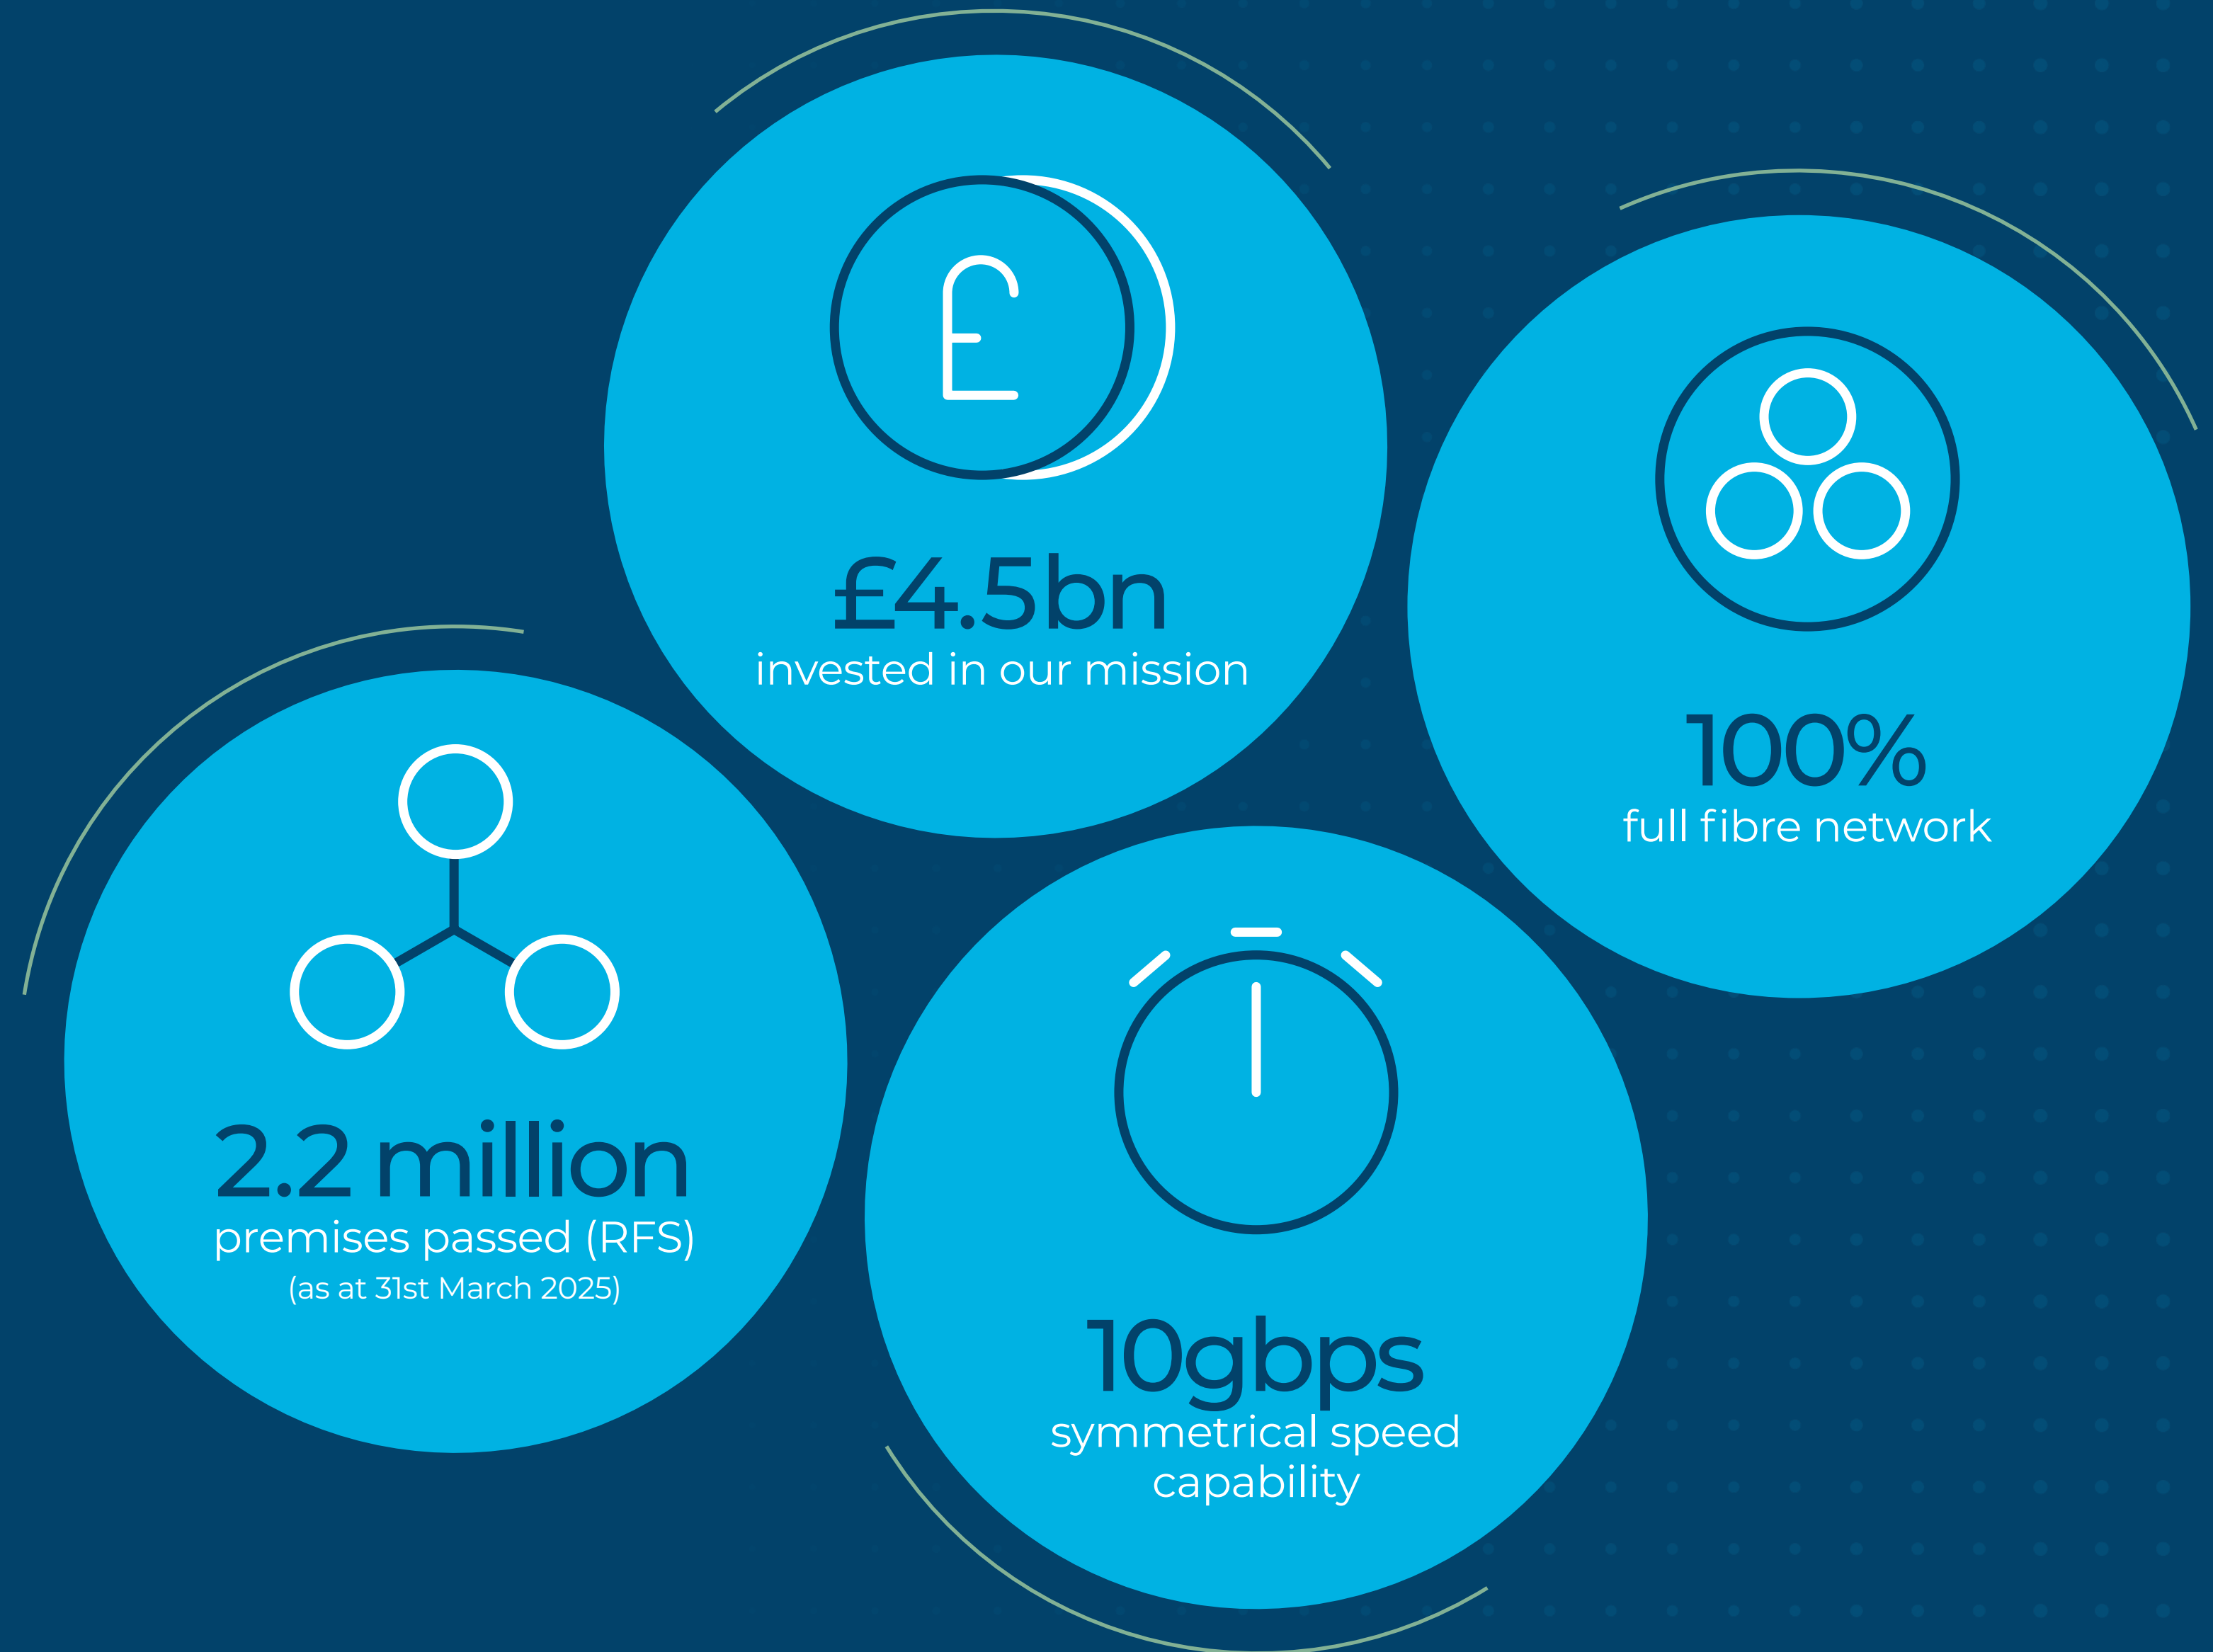

Our mission remains unchanged: to create a national-scale challenger to Openreach, in collaboration with our partner Virgin Media O2. Backed by committed investors, we're here to deliver long-term wholesale choice for ISPs and real, lasting benefits for UK consumers.

Rajiv Datta, CEO

nexfibre is a next generation fibre network operator, formed in December 2022. We are on a mission to deliver our network to more premises, using the latest XGS-PON architecture, capable of symmetrical speeds of up to 10 Gbps.

At-a-glance

Network rollout plan

This map shows our current footprint, and locations where we are planning to build.

The following pages provide a breakdown, by build location, of existing footprint, current activity and planned build for 2025 and into 2026.

As at 31st March 2025.
