

---

# Network coverage update

As at 30 June 2025

---

# Foreword

nexfibre continues to make substantial progress in bringing full-fibre broadband to underserved communities across the UK. With coverage now exceeding 2.3 million premises, we are among the country's largest alternative fibre operators.

Our optimised build plan remains on track, driven by the agility and commitment of our unique ecosystem of dedicated team members and partners. Together, we are delivering a technologically-advanced, XGS-PON-only network designed to serve generations to come.

This long-term focus informs our view of the need for sustainable, nationwide competition in the fibre access market, which today is fragmented and subscale, yielding constrained business models and substantial financial stress.

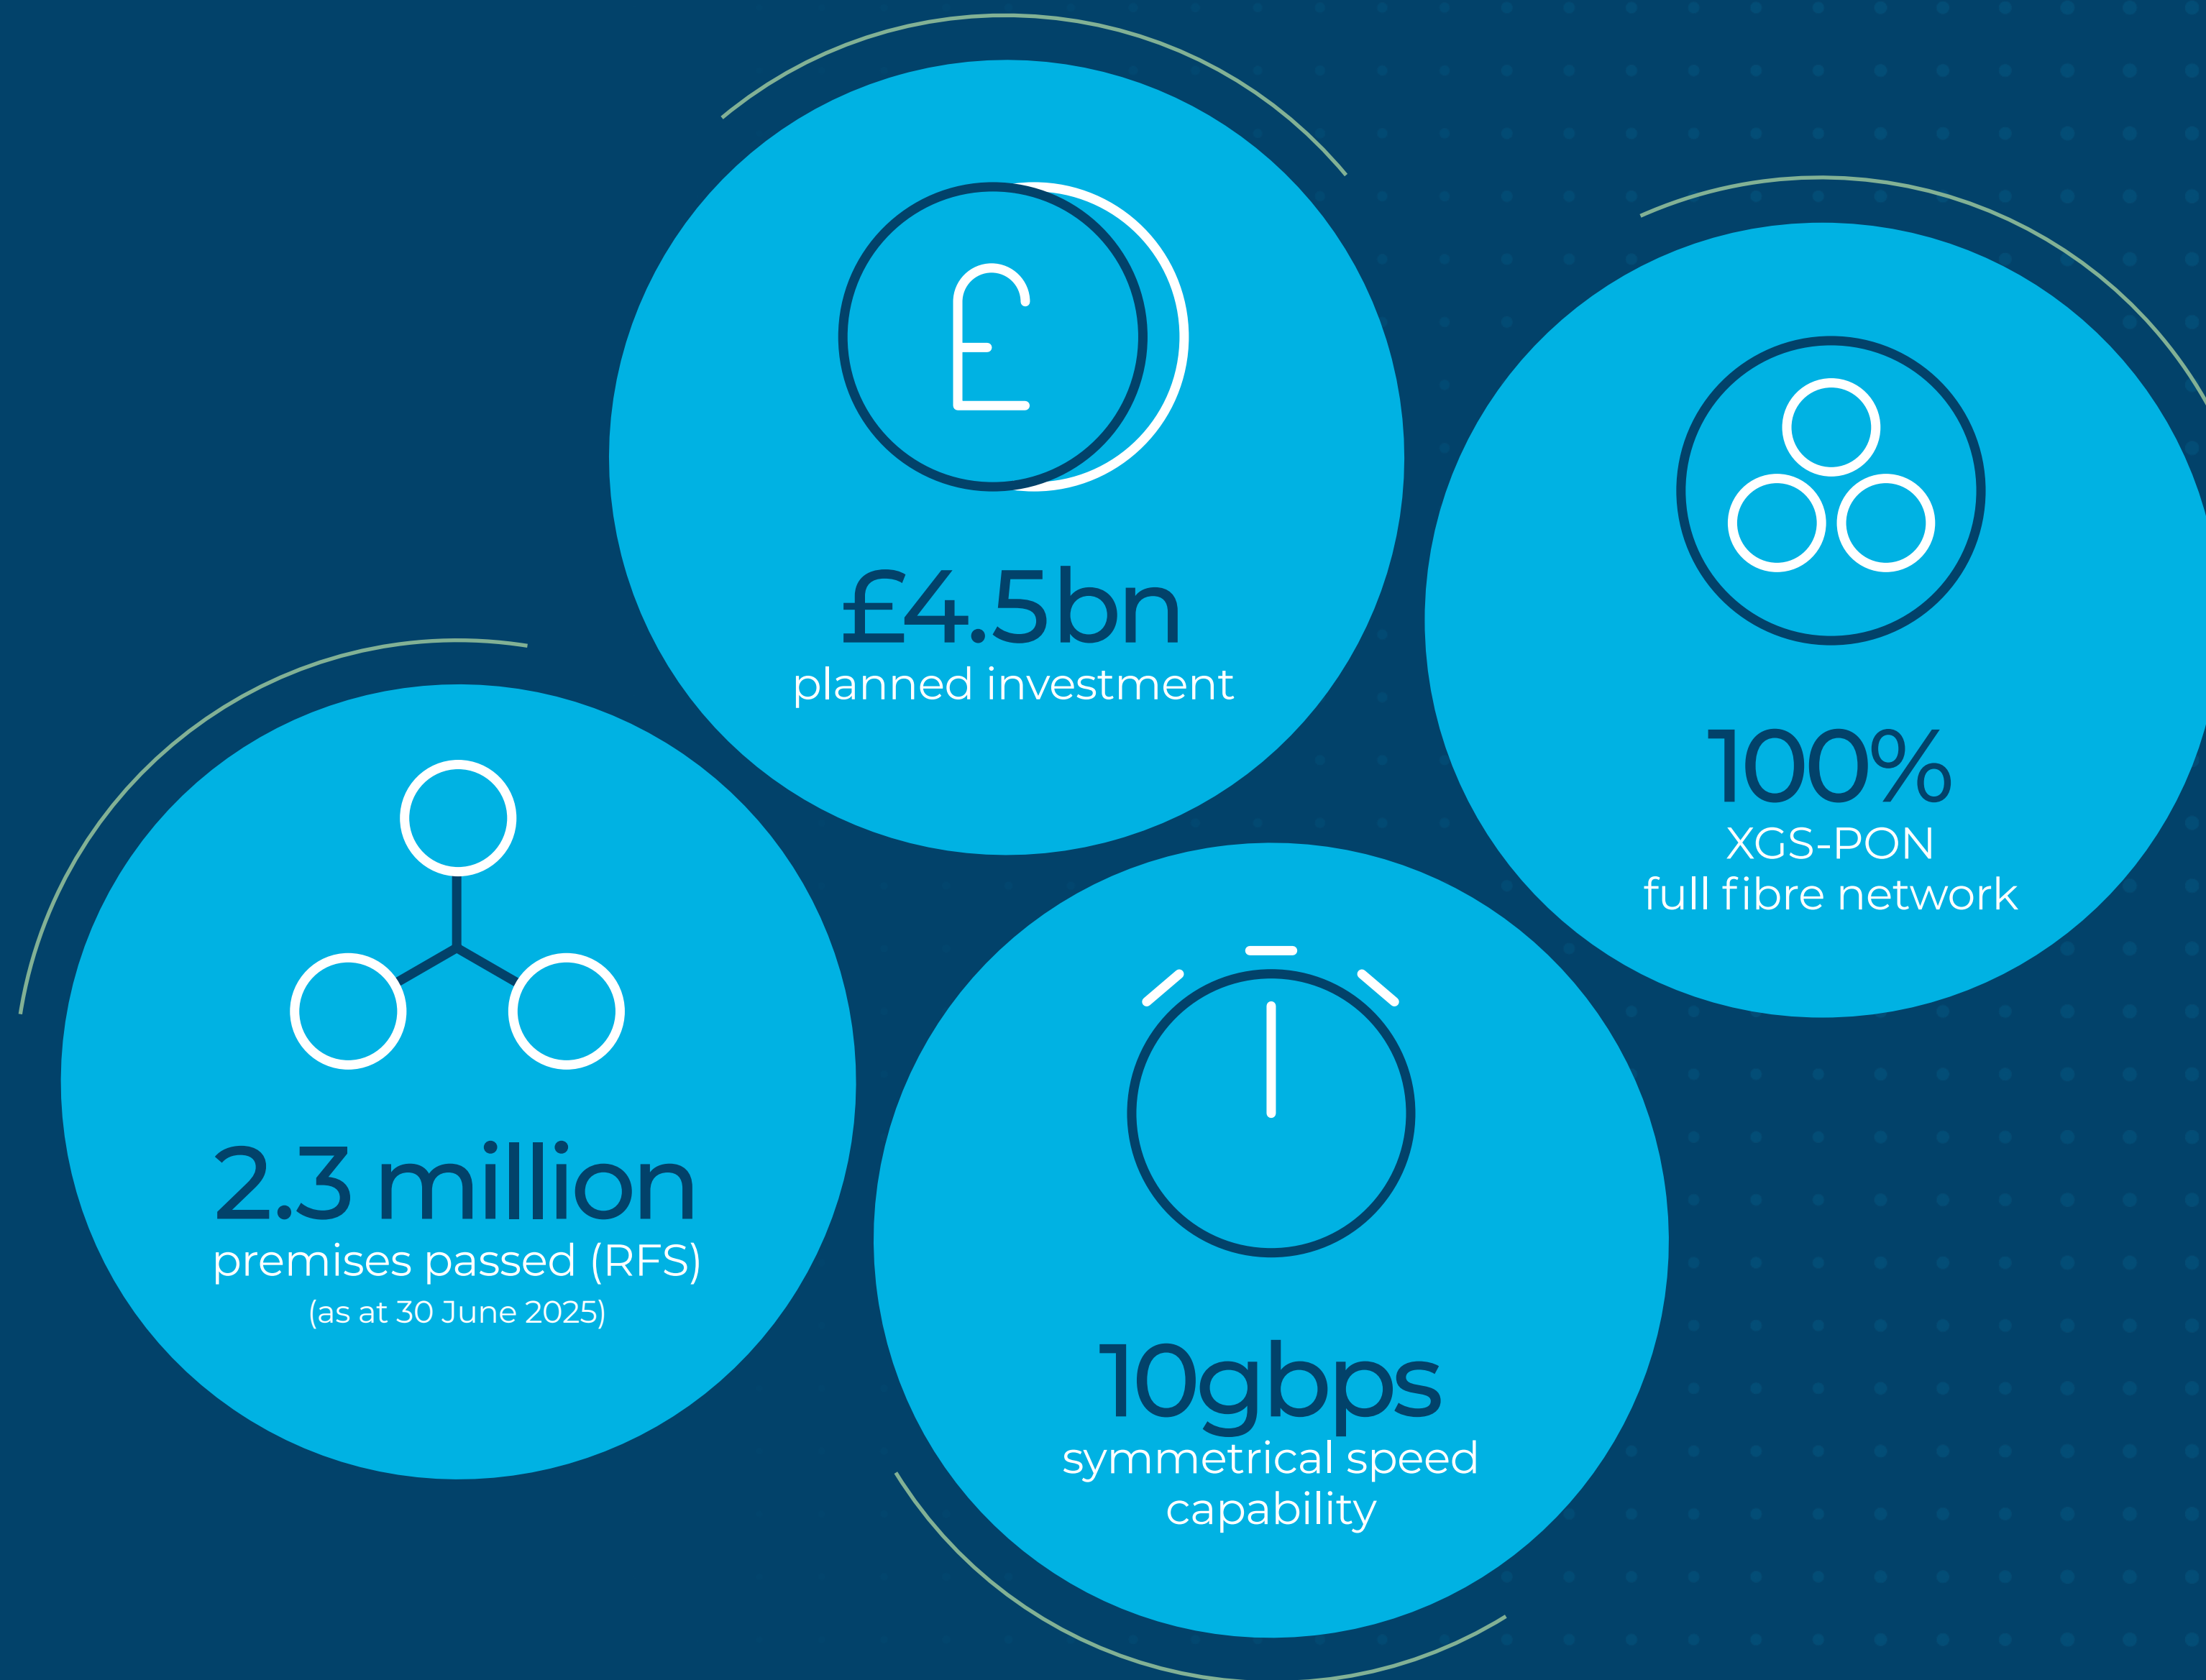

Backed by strong investors and significant financial resources, nexfibre remains committed to creating a wholesale fibre access platform that will play a key role as the market moves toward meaningful consolidation and a structure capable of unlocking the full potential of world-class digital infrastructure.

**Rajiv Datta, CEO**

nexfibre is a next generation fibre network operator. We are committed to establishing a wholesale full fibre platform that drives enduring competition, expands access, and unlocks the innovation and connectivity the UK deserves.

## At-a-glance

# Network rollout plan

This map, and the following pages, shows our current footprint, and locations where we are planning to build.

As at 30 June 2025.
